Top Five Regrets of the Dying Bronnie Ware,2019-08-13 Revised edition of the best-selling memoir that has been read by over a million people worldwide with translations in 29 languages. After too many years of unfulfilling work, Bronnie Ware began searching for a job with heart. Despite having no formal qualifications or previous experience in the field, she found herself working in palliative care. During the time she spent tending to those who were dying, Bronnie's life was transformed. Later, she wrote an Internet blog post, outlining the most common regrets that the people she had cared for had expressed. The post gained so much momentum that it was viewed by more than three million readers worldwide in its first year. At the request of many, Bronnie subsequently wrote a book, *The Top Five Regrets of the Dying*, to share her story. Bronnie has had a colourful and diverse life. By applying the lessons of those nearing their death to her own life, she developed an understanding that it is possible for everyone, if we make the right choices, to die with peace of mind. In this revised edition of the best-selling memoir that has been read by over a million people worldwide, with translations in 29 languages, Bronnie expresses how significant these regrets are and how we can positively address these issues while we still have the time. *The Top Five Regrets of the Dying* gives hope for a better world. It is a courageous, life-changing book that will leave you feeling more compassionate and inspired to live the life you are truly here to live.

Bloggng, Citizenship, and the Future of Media Mark Tremayne,2012-10-02 This collection of original essays

addresses a number of questions seeking to increase our understanding of the role of blogs in the contemporary media landscape. It takes a provocative look at how blogs are reshaping culture, media, and politics while offering multiple theoretical perspectives and methodological approaches to the study. Americans are increasingly turning to blogs for news, information, and entertainment. But what is the content of blogs? Who writes them? What is the consequence of the population's growing dependence on blogs for political information? What are the effects of blogging? Do readers trust blogs as credible sources of information? The volume includes quantitative and qualitative studies of the blogosphere, its contents, its authors, and its networked connections. The readers of blogs are another focus of the collection: how are blog readers different from the rest of the population? What consequences do blogs have for the lives of everyday people? Finally, the book explores the ramifications of the blog phenomenon on the future of traditional media: television, newspapers, and radio.

The Blog That Became a Book Edward Trice,2013-10-31 This book began as a series of posts on my blog/website edwardsjournal.com in April 2008. Spirited by the need to vent my frustrations with daily life, the posts expanded in choice of subjects. The elections and events of that year, economic collapse, disturbing lies with a horrific war all provided ample fuel to blog. The posting dates provided a running factual history of occurrences as I saw them then. The events from the beginning to the present has been a treasure chest to look back on and a reference for what is truly problematic to all of us. Reaching every concern of my life, especially democratic issues, sports, my journal became more personally therapeutic with each and every post. These blogs reflect my humble understanding of our world and it's events. With as much gratitude and appreciation to my readers that can be imagined for finding the time to read and consider it's content , I offer my book from my blog

Academic Paper from the year 2018 in the subject Pedagogy - Media Pedagogy, grade: 76, The Open University (School of Educational Technology), course: Technology-Enhanced Learning: Practices and Debates, language: English, abstract: This paper presents the critical reflection on technology-assisted learning. It is based on the choices practitioners make about how to apply technologies to their learners and the choices learners make about their own learning, in terms of what technologies they use, why and how. Based on three main learning activities: blog and blogging, Reading Price (2007) and, the learner experience; reflection uses concrete example to explain what allows the author to understand the choices, experiences and methods of practitioners and learners in the application of technologies to education. A brief takeaway from the discussions is that learners and practitioners have different choices in specialized technologies. Learner's experience is grounded on four major things: familiarity with technology, students' perceptions, Students expectations and efficacy and effectiveness ensures teachers realize their intentions of their course design, relative to the use of technology (approach). Based on these, recommendations were made on how courses and learning activities could be better developed.

Demystifying Scholarly Metrics Marc W. Vinyard, Jaimie Beth Colvin, 2022-02-25 Demystifying Scholarly Metrics gives librarians and faculty the confidence to navigate the maze of scholarly metrics, identify quality journals in which to publish, and measure the impact of scholarly works. Both librarians and professors can be overwhelmed by the bewildering number of scholarly metrics. This user-friendly book demystifies them, helping librarians become familiar with scholarly metrics and giving them the confidence to assist faculty at their institutions. It also equips faculty authors with the knowledge to evaluate journals and use metrics to track their scholarly impact. Several controversies exist in the scholarly metrics landscape, including a disagreement between the proponents of altmetrics and traditional bibliometrics. Even more contentious debates are breaking out over predatory journals and open access publishing. Authors Mark Vinyard and Jaimie Beth Colvin, who successfully launched a faculty publishing initiative, explain which aspects of metrics are truly essential to grasp, and they place these numbers in context. They help readers identify the metrics that are the best fit for their scholarship and give librarians and professors the tools to make smart decisions in this changing scholarly metrics landscape.
